SUMMARY

Results-driven Operations Associate leveraging 2+ years of specialized experience in backend healthcare operations and service coordination within health-tech environments. Expertise in orchestrating end-to-end service delivery, meticulously coordinating cross-functional efforts between patients, hospitals, and laboratories to ensure operational accuracy. Proficient in managing high-volume workflows, encompassing appointment scheduling, rigorous data validation, and complex grievance management, all while adhering to strict regulatory standards. Proven capability to streamline operational processes and integrate Systems knowledge to enhance service quality and support Finance objectives within regulated settings.

AREAS OF EXPERTISE

Operations & Process Management

Escalation Resolution, Grievance Management, Process Mapping, Process Tracking, Quality Assurance, Claims Adjudication, Service Coordination, SOP Documentation, SOP Development, Service Delivery, Workflow Optimisation, Appointment Scheduling

Healthcare Domain Expertise

Cashless Authorisation, Clinical Support Services, HIS/EMR Systems, Healthcare Operations, Healthcare Service Delivery, Insurance Claims Processing, Prescription & Lab Test Management, Provider Network Coordination, TPA Coordination

Data Analysis & MIS

Data Analysis with Python, Data Tracking, Data Testing, Data Validation, Data-driven Insights, KPI Monitoring, MIS Reporting, Reporting & Analytics, Reporting & Dashboards, Trend Analysis

Technical Tools & Software

CRM Systems, Excel, Google Sheets, Power BI, SQL, Ticketing Platforms, Zoho Projects, Zoho Ticketing Systems, Business Intelligence Software

EXPERIENCE

Wellness Hospital

MIS Executive | February 2026 - Present

- Managed comprehensive hospital data, tracking operational KPIs, and providing analytical insights through MIS reporting to support Finance and process improvement, demonstrating Ownership of data integrity.
- Collected, compiled, and analyzed hospital data related to operations, wellness programs, and clinical Systems support services with meticulous Attention to detail.
- Prepared and presented daily, weekly, and monthly MIS reports for management and department heads, showcasing Forward thinking in data visualization.
- Maintained accurate and up-to-date records of patient statistics, OPD/IPD data, and wellness program outcomes, taking Pride in making things run efficiently.
- Monitored and tracked key performance indicators (KPIs), including occupancy rates, revenue, patient footfall, doctor performance, and service utilisation, providing Commercial insights.
- Provided data-driven insights and analytical support to hospital management for decision-making and process improvement, operating in a Fast paced, evolving environment.
- Ensured accuracy, consistency, and timely submission of reports across all departments, driven by a Proactive approach.
- Coordinated with clinical, administrative, HR, Finance, and wellness teams to collect and validate required data while exhibiting a strong Willingness to learn new data sources.
- Managed hospital information Systems, MIS dashboards, and databases, including HIS/EMR systems, focusing on operational efficiency.
- Supported internal and external audits, compliance requirements, and management review meetings, adhering strictly to protocols.
- Maintained strict confidentiality and security of patient and hospital data in compliance with healthcare regulations, underscoring professional responsibility.
- Automated and optimized reporting processes using Excel, MIS tools, or business intelligence software, demonstrating a Proactive effort towards efficiency.
- Analyzed trends, identified gaps, and recommended opportunities for operational efficiency and service enhancement with a Forward thinking perspective.

ekincare

Healthcare Operations Executive | January 2025 - February 2026

- Orchestrated end-to-end healthcare service delivery, handling insurance operations and managing claims adjudication for corporate clients and provider networks with high Attention to detail.
- Managed end-to-end appointment coordination and healthcare service delivery for corporate clients and provider networks, operating within a Fast paced, evolving environment.
- Processed customer queries related to prescriptions, laboratory tests, consultations, and order fulfilment with accuracy and domain knowledge, showing Ownership of resolution.
- Handled insurance operations, including claims adjudication, cashless approval processing, and authorization workflows, leveraging Finance and billing Systems.
- Coordinated with hospitals, Third-Party Administrators (TPAs), and internal stakeholders to expedite cashless authorizations and minimize service delays, acting Proactively.
- Applied structured escalation frameworks to resolve service disruptions and claim-related issues efficiently, demonstrating Willingness to learn complex insurance policies.
- Maintained operational records, including service request tracking, claims status updates, and case closure documentation with high Attention to detail.
- Ensured compliance with Standard Operating Procedures (SOPs), policy guidelines, and quality benchmarks, taking Pride in making things run efficiently.
- Reduced authorization turnaround time or improved resolution rate through Forward thinking process adjustments.
- Improved backend operational efficiency through report generation, Systems updates, and TAT monitoring, driving Commercial impact.

Teleperformance

Analyst | September 2023 - November 2024

- Validated large-scale datasets for accuracy, reliability, and suitability for AI model training applications, exhibiting strong Attention to detail and Ownership.
- Assessed training data against compliance standards and quality guidelines to ensure model readiness for advanced Systems.
- Developed structured documentation and Standard Operating Procedures (SOPs) for data verification processes, demonstrating Forward thinking standardization efforts.
- Conducted backend data testing to support AI tool development and performance optimization, applying analytical Finance principles where applicable.
- Maintained high data accuracy and compliance adherence while operating comfortably in a Fast paced, evolving environment.
- Generated weekly and monthly performance reports with analytical insights for senior management decision-making, highlighting Commercial findings.
- Applied analytical rigour and Attention to detail in high-volume data operations, driven by a Proactive approach to data quality assurance.

EDUCATION

NMIMS

MBA - Operations & Data Science Management July 2025 - Present (Pursuing)
